

United Technologies

Overview

United Technologies Corporation (UTC) has contracted with Exostar for an Identity Proofing Service for certain UTC-identified contractors. Each contractor who provides services to a UTC aerospace business unit and requires access to any UTC computer system is required by UTC to complete the Identity Proofing process. The following list are business units that may require contractors to complete the proofing process:

- UTC Aerospace Systems (UTAS)
- Pratt & Whitney
- Sikorsky
- United Technologies Research Center (UTRC)
- UTC Corporate

The UTC Identity Proofing service requires a UTC contractor to purchase, register, schedule and successfully complete an in-person identity proofing appointment with an Exostar designated notary.
