

Invite - MAG

Inviting users and organizations to Exostar's Managed Access Gateway (MAG) is a customer organization (buyer) function. Using Exostar's Adoption Module, customer organizations (partner buyers) can:

- Invite new customer partner organizations and users (suppliers) to fully utilize the features of MAG and access partner applications.
- Invite current MAG partner supplier organizations and users to access partner applications.

If you are a customer organization and require assistance with Exostar's Adoption Module, please reference the [Adoption Administrator](#) section.
