Raytheon Supply Chain Platform (RSCP) Overview

e

Overview

Exostar's Supply Chain Platform for Raytheon (RSCP) is a comprehensive, hosted solution that enables visibility of operations and supply chain activity. The solution provides a real-time, end-to-end picture of supply and demand performance with built-in decision support tools.

Click the arrows below to read further about the overall RSCP process, benefits, and roles available to users.

Please select the image to enlarge:

- Decrease supply chain transaction times and effort - electronic communication of data plus the ability to manage by exception makes the whole end to end process faster.
- Improve accuracy of supply chain information - information is pulled from one RSCP document type to another where relevant, preventing re-keying errors.
- Provide status of invoices and shipments - both buyer and supplier can see the level of progress made which makes follow-up calls/e-mails unnecessary.
- Improve collaboration on demand forecasts - buyer and supplier can work collaboratively on forecast data to improve accuracy of production and supply requirements.
- Manage by exception - items that fall outside of normal parameters can be quickly located and addressed.
- Reduce the risk of potential shortages through improved and more effective communication.

Supplier Administrators are able to:

- Assign roles to other individuals
- Acknowledge orders
- Create ASNs and Invoices

Supplier Users are able to:

- Acknowledge orders
- Create ASNs and Invoices

Supplier Viewers are able to:

- View order information (not take any action)

Shippers are able to:

- Facilitate the ASN process
- View order information (not take any action)
