e

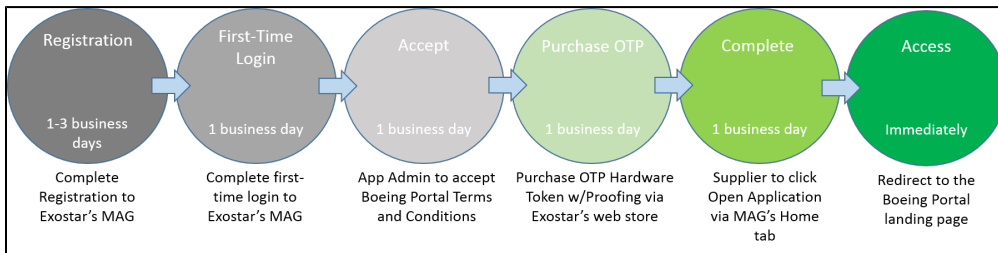

## Overview

Boeing and Exostar have partnered by launching the One ID Program to mitigate Advanced Persistent Threat (APT) risks within the supply chain and require each supplier obtain a One Time Password (OTP) hardware token to access the Boeing Portal (BP).

As part of our on-going efforts to improve security of critical information assets, we require each customer to use the Exostar's Managed Access Gateway Platform (MAG) to access Boeing's Portals. Boeing selected Exostar for this capability because of their expertise and our experience with them for Supplier Portal account holders. Customer organizations are required to complete the Exostar sign-on process prior to beginning the Boeing process to be authorized to specific applications and data sources within Boeing's Portals.
