Credentialing - Lockheed Martin

e

Please select from the links below for step-by-step instructions on the credentialing process:

[New Users](#): This link provides instructions on completing a credential purchase, activating the license key, completing the proofing process, registering a phone, and logging in with the credential.

[Existing Users](#): This link provides instructions on renewing your token and upgrading your proofing.

[BAE Systems Users](#): This link is specific to BAE users using Procure to Pay.

Two-factor authentication (2FA) is a required method of enhanced authentication used to verify the identity of suppliers and address cyber security risks associated with the Lockheed Martin supply chain. Due to the increase in frequency and sophistication of cyber attacks against the aerospace and defense industry, the multi-factor authentication security credential provides enhanced authentication which is used in addition to your Exostar MAG UserID and password to prevent unauthorized access and address cyber security risks associated with the Lockheed Martin supply chain.

If you do not have a credential, Lockheed Martin recommends purchasing Phone OTP with Identity Proofing. The annual cost for Phone OTP is \$40.00 for US users and \$80.00 for international users.

If you have already registered an acceptable credential to your MAG account but have additional Exostar user accounts, you may be able to leverage the credential from one account to another for access to Lockheed Martin Procure to Pay (LMP2P). Please review the [Account Connections](#) section to learn more.
